NICHOLAS SHERAN POOL CLOSURE UPDATE

Thursday, November 12, 2026

Oki and hello,

We wanted to share the latest information regarding the temporary closure of Nicholas Sheran Pool.

This important City of Lethbridge life cycle project includes the replacement of the building's heating and ventilation system. It is a major investment that will improve air circulation throughout the facility and help extend the life of the building for years to come.

While the project has experienced some unexpected delays, work continues to move forward. Everyone involved is excited about the long-term benefits these upgrades will bring to the community.

We also want to thank participants for their flexibility in continuing programs at other Recreation Excellence-operated pools during the closure.

We are looking forward to welcoming everyone back to Nicholas Sheran Pool soon. We will share another update once a reopening date is confirmed.

Thank you for your continued support, patience and understanding.
